***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: Instant claims, a divisional of U.S. Patent 6,656,452, fully comply with U.S. rules and practice. The claims are also free of any prior art. The closest prior art, Garvey et al (5,703,073), teaches compositions and methods to prevent toxicity induced by nonsteroidal antiinflammatories (NSAIDs). Garvey teaches a method of treating inflammation, pain and/or fever in an individual in need thereof which comprises administering to the individual a composition comprising a therapeutically effective amount of an NSAID, which may optionally be substituted with at least one NO group, and an NSAID toxicity reducing amount of a nitric oxide donor in a pharmaceutically acceptable carrier.

Garvey et al does not teach or suggest a method of treating or preventing non-pulmonary inflammation in a mammal comprising inhalation of a therapeutically effective amount of gaseous nitric oxide.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
